Website Development with HTML and CSS

Provider (riadh coding)

Date: (Apr, 2024)

Java Programming Course

Provider (Mohamed El Dasoqi)

Date: (Oct, 2023)

Experience and Projects:

IT Internship Experience

During my internship, I gained practical experience in cPanel, web hosting, domain management, and troubleshooting. Key tasks included:

- Managing domains, registering new ones, and creating subdomains.
- Using cPanel for file uploads, database creation, and backups.
- Troubleshooting database connection issues and escalating problems.
- Organizing domain management with Excel.

This experience significantly enhanced my technical skills and prepared me for real-world challenges in web development and hosting.

Podcast Streaming Website

Designed and developed a multi-language, multi-genre podcast streaming platform, integrating a user-friendly login and registration system. This platform enables users to easily discover and listen to podcasts in their preferred language and genre, while allowing them to create new accounts and log in securely using their credentials stored in the database.

Tools and Technologies:

HTML, CSS, JavaScript, PHP, MySQL

Personal Portfolio Project

designed and developed a digital portfolio that showcases my skills, works, and achievements in a professional manner. The website includes sections about my resume, previous projects, and services. The goal of this project is to enhance my digital identity and provide an opportunity for potential employers and clients to easily learn about my capabilities.

Tools and Technologies:

HTML, CSS, JavaScript, and PHP.

3. Origami Art Tutorial

An interactive web page introducing the art of origami, including a description of origami and a tutorial video showcasing how to create paper shapes.

Tools and Technologies:

- Languages: HTML, CSS.
